The complete IT solution for your business

Complete IT Solutions

FINFO is a complete IT solutions provider for small to medium businesses in and around Melbourne.

Our clients range in size from 5 to 50+ employees and represent a cross section of many industries including financial, legal and retail.

Although our clients' requirements may sometimes differ, there is always one fundamental similarity: Technology must support their business and operate reliably.

FINFO is dedicated to delivering superior and enduring solutions to match your business infrastructure.

Our total solutions approach provides business application integration, IT support and preventative maintenance, with a broad selection of on-site and remote IT services.

FINFO pro-actively maximises your investment in IT infrastructure to enhance your business's potential.

Delivering Expertise

Remote Access

FINFO increases the productivity of your staff by providing them with secure and efficient remote access. Remote Access Technologies also allow our technicians to provide rapid response from our own secure remote locations.

Backup

FINFO strongly believes that secure backups should be part of your overall IT plan to protect the intellectual property of your company.

Our industry leading backup solutions ensure the safety and security of your critical business data.

Server & Desktop Maintenance

Regular, comprehensive, hardware and software maintenance to keep your systems safe, secure and reliable.

Software updates, virus and malware prevention and removal, hardware replacement and more.

Networking

Safe, secure and reliable. Internet, inter-office, remote access, mobile device integration and wireless access.

Document Management

Security, ease of use and the ready availability of your documents and correspondence. Document Management Systems for scanning and electronic storage, search and retrieval.

Technology Experience

Desktop Technologies

Microsoft business based desktop and notebook operating systems from Windows 98 to Windows Vista.

Server Technologies

Microsoft Windows business server technologies, from Windows Server NT through to Windows Server 2008.

Application Technologies

Industry leading business applications for the financial, legal, medical and retail sectors.

Device Technologies

Complete hardware solutions to run your critical applications: servers, desktops and notebooks, communications and networking and mobile integration.

FINFO can provide the complete IT solution for your business.

To discuss your needs, call us on 1300 785 223.
